Menomonee Falls, WI 53051

Since it was founded in 1989 the Farm Financial Standards Council has continued to provide leadership and direction in helping American ranchers and farmers maintain viable financial record keeping programs. This has come about through the continued dedication of individuals and companies who have become **a part of it**.....Promoting uniformity and integrity in financial reporting and analysis for agricultural producers.

Today the Council is more active than ever. Through alliances within the agricultural industry and a network of dedicated professionals the Council continues its work.

As individuals and businesses, the *Financial Guidelines for Agriculture* and the *Management Accounting Guidelines* are part of the foundation used every day in serving agriculture. To insure the Council has the resources to sustain and support the Council as it moves forward would you consider supporting the Council at a level that represents your organization and the value it receives because of its work?

There are several options available with variable levels of benefits and recognition.
